Silver Dragon Firearms Instruction

NRA Basic Pistol Course

Teaches the basic knowledge, skills, and attitude for owning and operating a pistol safely.

This **Basic Pistol Course** is at least 8-hours long and includes classroom and range time learning to shoot revolvers and semi-automatic pistols. Students learn NRA's rules for safe gun handling; pistol parts and operation; ammunition; shooting fundamentals; range rules; shooting from the bench rest position, and two handed standing positions; cleaning the pistol; and continued opportunities for skill development. Students will receive the NRA Guide to the Basics of Pistol Shooting handbook, NRA Gun Safety Rules brochure, Winchester/NRA Marksmanship Qualification booklet, take a Basics of Pistol Shooting Student Examination, and course completion certificate. (Lesson Plan 2nd edition, 2009)

Private Instruction

I offer **private instruction** working with a single individual or a family unit to develop firearms abilities specific to that person or family. This individual attention can advance the firearms user from basic handgun use to developing skills at a higher level, up to training a family to work as a unit for home safety and defense.

Advanced and Tactical Training

The **Advanced Pistol Course** is designed for students who have completed the basic pistol course. In advanced pistol, the student is taught more advanced techniques for handling handguns in situations other than target practice. This hands-on course is comprised mostly of range activities including shooting and practicing. Covered materials include: mindset; proper draw from holster; one hand shooting, strong and weak; reloading and malfunction clearing; combat target shooting/shot placement for maximum effect; as well as shooting positions.

The **Tactical Handgun Course** is

designed for students who have completed the Advanced Handgun Course. The tactical handgun course builds on the advanced course to develop combat skills in the handgun shooter. This course includes cover/concealment differences and shooting positions, shooting and movement, as well as target selection and multiple target shooting.

I offer complete training for safe and competent handgun handling and use. These courses are designed to take the new handgun user step by step to become a well-trained handgun shooter who can safely and confidently handle and deploy a handgun in almost all circumstances in or outside the home.
